Statement by the Board and Executive Management

On February 24, 2023, the Board of Directors has approved the Q4

Interim Report for 2022 (January 1 – December 31).

The interim report is unaudited.

About Shape Robotics A/S

Shape Robotics is a Danish EdTech company that offers primary learners digital and technological skills education, fostering lifelong interest and teaching basic STEAM vocational digital skills at an early age. Through our technology labs and basic robotics, young learners are taught introductory programming, robotics and AI in an environment that promotes problem-solving and teamwork, capabilities that will be useful no matter what eventual career the student will have. For today's youth to be digitally prepared for the future, internet access and a computer are no longer sufficient. By promoting more advanced digital and technological skills at an earlier age, the school curriculum will provide widespread digital and technological literacy and a head-start for students aiming for STEAM fields.

About the Interim Report

Auditor's review

The Interim report and quarters in 2022 has not been reviewed by the Company's auditor. FY 2021 is audited.

Net sales and operating result

Net sales was TDKK 87.385 (17.770). EBITDA was TDKK 273 (-15.512).

Balance sheet and equity ratio

Total assets amounted to TDKK 104.957 (26.048), and primarily consisted of inventories and trade receivables.

Shareholder's equity amounted to TDKK 43.830 (14.993), and liabilities amounted to TDKK 61.127 (11.055). Shareholders equity includes TDKK 402 (1.470) of Treasury shares.

Cash Flow and investments

Cash flow amounted to TDKK 2.701 (-7.180).

The share

The shares of Shape Robotics A/S were listed on Nasdaq First North Growth Market Denmark on June 25, 2020. On December 31, 2022, the total number of shares was 10.462.619 (of which 41.034 are treasury shares).

CEO letter 1/2

The digital transformation is presenting unprecedented opportunities for society and the economy. However, as digital capabilities continue to grow, there is a clear need for enhanced digital education and training across all age groups to effectively meet daily demands. In September 2020, the EU introduced the Digital Education Action Plan, which emphasizes the integration of digital education into all forms of education and training. The Recovery and Resilience Funds (RRF) further support this integration by allocating 20% of funds to digital transformation initiatives. As a part of this plan, the European Commission is assisting member states in equipping their schools for successful digital transformation.

The RRF is a strategic EU plan created to support European societies toward investments in challenges and opportunities of green and digital transitions. The plan comprises grants and loans of EUR 723 billion, wherein EUR 45 billion are allocated for educational purposes. For educational purposes, the fund has allocated approx. EUR 13 billion for the digitalization of European schools and digital learning.

Following the completion of education projects funded by the recovery and resilience plans, the European Union has indicated a continued focus on digitalization, beyond 2026 – indicating that programs or project funding with focus on education will follow after the recovery and resilience funding.

Shape Robotics recognizes the growing demand for educational technology and aims to become a leading provider in Romania by leveraging established partnerships with global technology companies. Our primary objective is to create exceptional learning experiences in Romania and utilize this success as a launchpad to expand into other countries. This approach aligns with Romania's ambition to lead digital education efforts among EU member states.

CEO letter 2/2

As a result, Shape Robotics' management and Board of Directors have decided to pursue additional funding opportunities through a proposed rights issue emission in March or April. We believe this additional investment will enable the company to replicate our successes from Romania into other selected countries such as Poland, Bulgaria and Republic of Moldova. Expansion into new geographical markets are associated with significant up-front investments in office leases, recruitments of administrative staff and not least a qualified sales team with a relevant network.

The Edtech market in especially the East European countries develops quickly and attracts significant political and public interest driving new projects being offered in competitive tender processes. Timely and rapid implementation is critical to capitalize on such emerging opportunities in new markets, as many projects are expected to commence in 2023 and 2024. The strategic plan for 2023 includes deploying local teams in at least one of the aforementioned markets to assist distributors, conduct teacher training sessions, and create customized marketing and educational content, while the strategic plan for 2024 involves expansion into further new geographical markets. Implementation of these strategic plans is subject to completion of the intended rights issue.

In the year 2023, prior to factoring in the potential success of implementing new teams and gaining entry into novel markets, our estimated revenue range is expected to fall between DKK 130-140 million. In addition, we anticipate an EBITDA before non-recurring costs to be approximately DKK 3-5 million. These figures are indicative of a growth rate of approximately 50-60% in relation to our revenue. Furthermore, it is our objective to list our company on the Nasdaq Main Market Copenhagen by year-end.

André Reinhard Fehrn

Chief Executive Officer

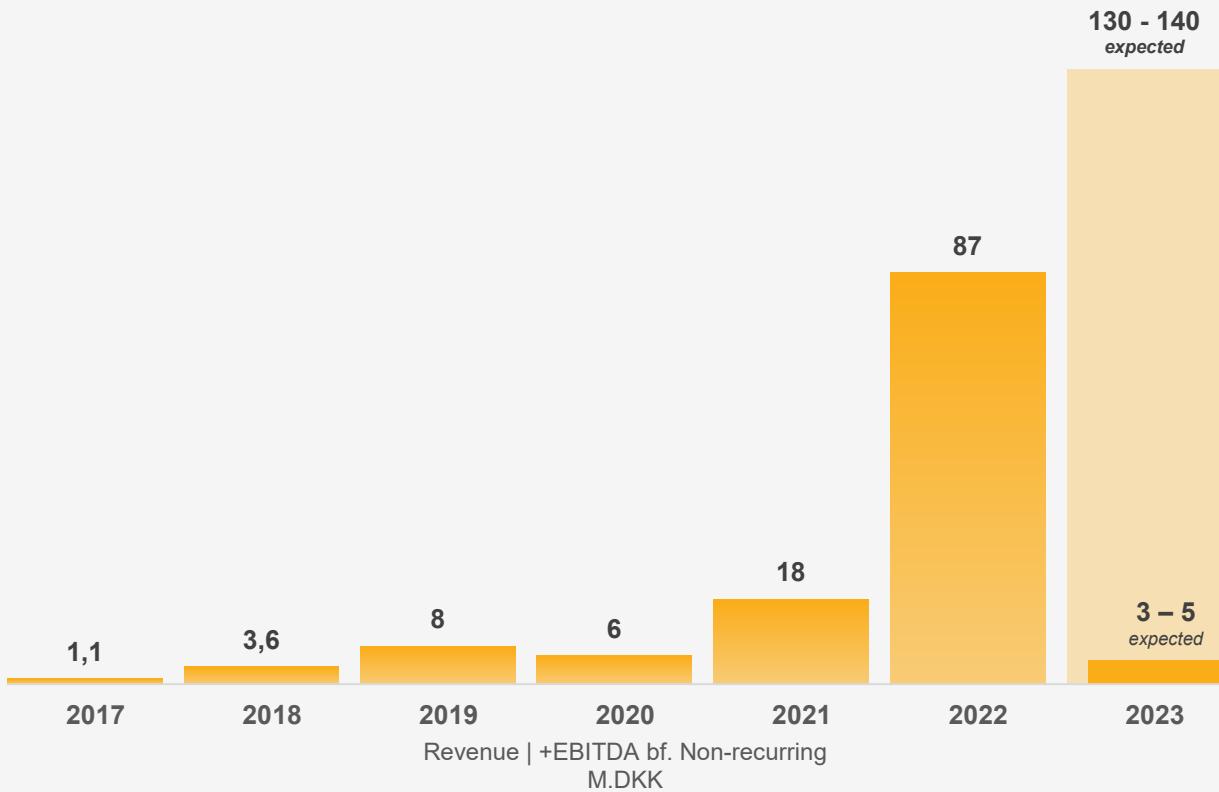

Full year outlook

The company's strategy is to continue to expand its international sales channels, participate in selected public projects, optimize operations and introduce new products and services. The aim is to strengthen the company's position as a leading global provider of educational technology.

The growing demand for robotics and digital solutions in the education segment as well as ready-made and thoroughly tested turn-key STEAM Labs support Shape Robotics' expectation of high growth in the future.

The company expects **revenue** in the range of **MDKK 130 to 140** in the financial year 2023, and an **EBITDA** of **MDKK +3 to +5 (bf. non-recurring costs)**.

Highlights 2022

Highlights Q4 2022

Investment of 26 mio. DKK

In November 2022, Shape Robotics announced its revenue expectations of at least DKK 130 million for the year 2023, with a projected positive operating result. To support its growth plans, the company secured an investment of over DKK 26 million from the investment firm Fundamental Invest and its customers. With this injection of capital, Shape Robotics aims to achieve a listing on Nasdaq Main Market Copenhagen in 2023.

Partnership with Network One Distribution

In December, Shape Robotics, announced a partnership with NOD (Network One Distribution), a leading electronics and IT distributor in Romania. Over the next three years, they will sell Shape Robotics' "Fable" robot, as well as 3D printers and VR glasses through NOD's distribution network. The first order of approximately 7 million DKK was delivered in the same month, and both parties expected similar orders to be placed about three times a year in the coming three years, totaling an expected billing value of 60 million DKK. The partnership aligns with Shape Robotics' growth strategy to strengthen its market position in Romania and meet the high demand for educational technology in the region. NOD is a market leader in Romania with over 20 years of experience and a revenue of over 3 billion DKK annually. They aim to implement innovative solutions and the latest technologies to promote the modernization of Romanian society.

"The partnership with NOD is part of the company's strategy to build a solid distribution and integration network in Romania to quickly scale up and implement technology in local schools, businesses, and institutions with high usability for teachers and documented learning effects for students."

André Fehrn, CEO Shape Robotics

Statement by the Board of Directors and Executive Management

Statement

Today the Board of Directors and the Executive Management have discussed and approved the interim report of Shape Robotics A/S for the financial period 1 January – 31 December 2022.

The interim report has been created in accordance with IAS 34, Interim Financial Reporting as approved by the EU and additional disclosure requirements for companies listed on NASDAQ First North Denmark.

In our opinion, the financial statements give a true and fair view of the company's financial position on 31 December 2022 and of the results of the company's operations and cash flows for the financial period 1 January – 31 December 2022.

The management's review includes in our opinion a fair presentation of the matters dealt with in the report.

The interim report is unaudited.
